

Experiment Analysis Report

1. Accuracy Comparison

Accuracy comparison of models based on prediction correctness.

| model_name | 0 |
|------------|---|
|------------|---|

| | |
|------------|-----|
| Base Model | 0.7 |
|------------|-----|

| | |
|----------------|--------------------|
| Ensemble Model | 0.6576923076923077 |
|----------------|--------------------|

| | |
|------------|--------------------|
| MC-Dropout | 0.7581967213114754 |
|------------|--------------------|

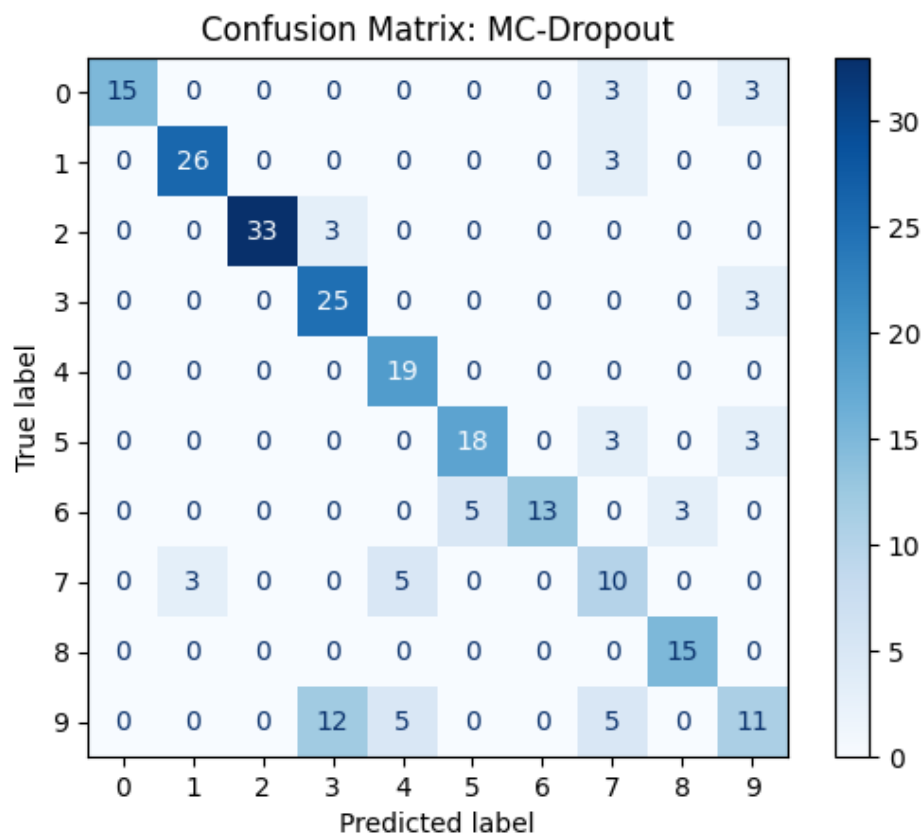

2. Confusion Matrices

Confusion matrices show prediction accuracy and misclassifications.

Confusion Matrix: Base Model

Confusion Matrix: MC-Dropout

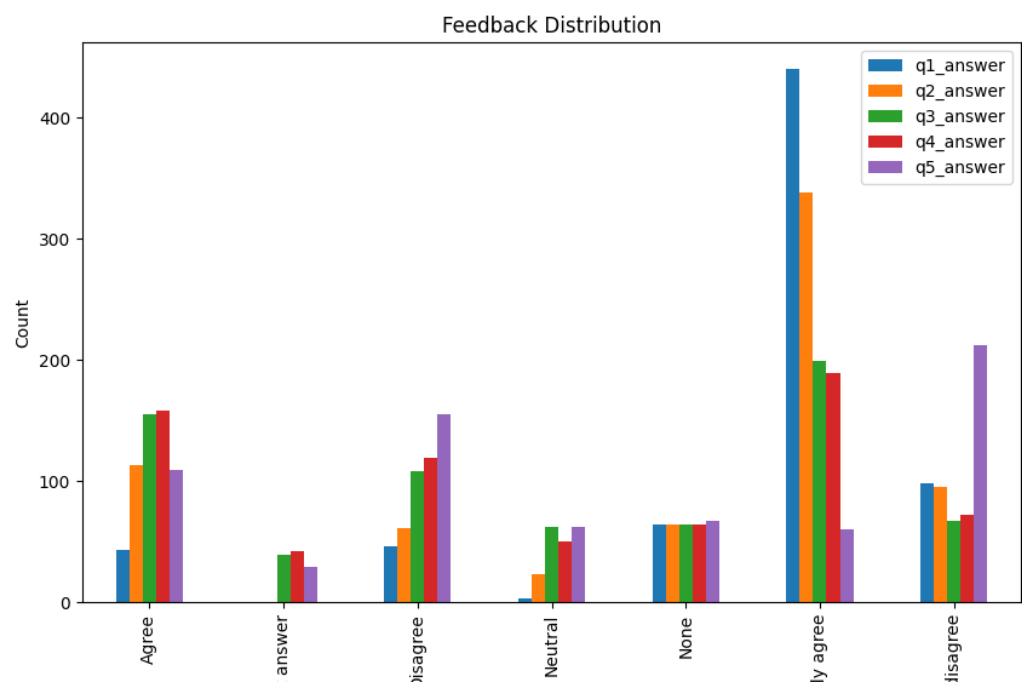

Confusion Matrix: Ensemble Model

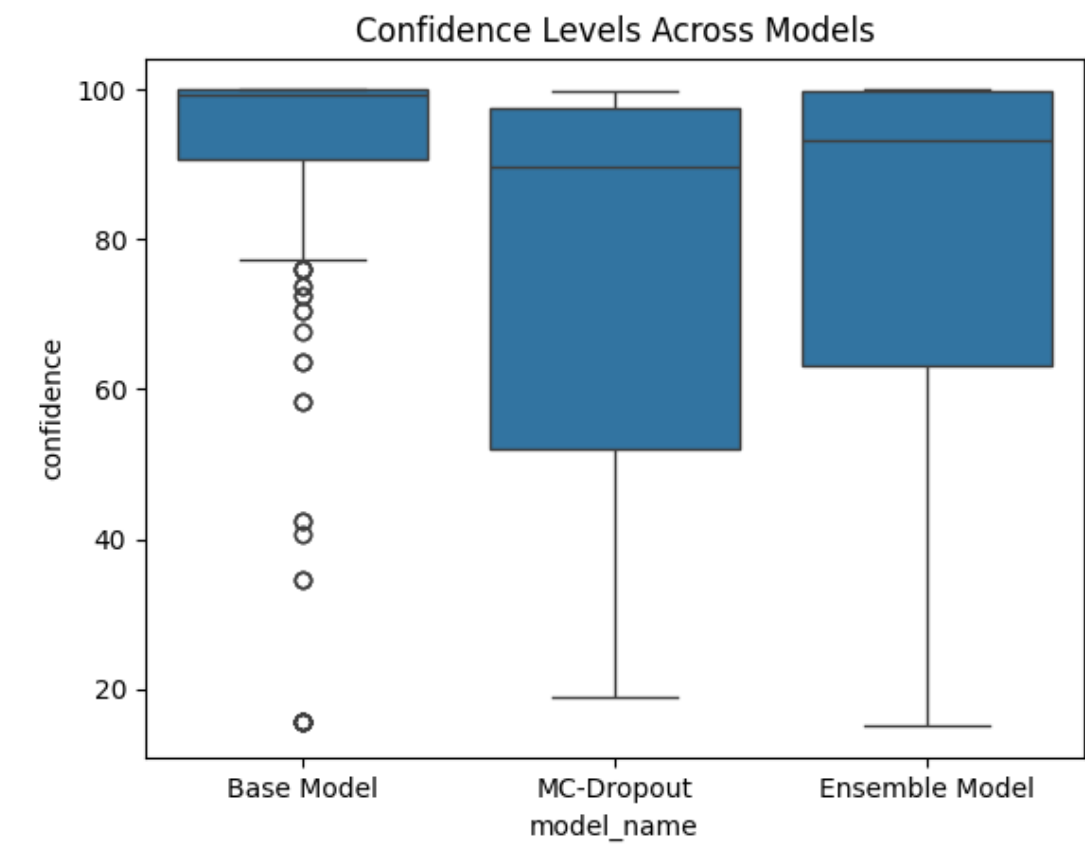

3. Feedback Distribution

Feedback ratings across models.

4. Confidence Analysis

Analysis of confidence levels with ANOVA and pairwise comparisons.

ANOVA F-statistic: 14.17, P-value: 0.000

Pairwise Comparisons:

Model Pair,Corrected P-Value

"('Base Model', 'MC-Dropout')",4.042466966495003e-07

"('Base Model', 'Ensemble Model')",0.00018487662474242397

"('MC-Dropout', 'Ensemble Model')",0.7491536172271419

5. Error Patterns

Heatmap of common errors in predictions.

6. Subject-wise Prediction Accuracy

Variability in accuracy across participants.
